## **Proposed Installation and Operation of an Explosive Destruction Technology Facility at the Blue Grass Army Depot in Kentucky, June 2013**

The Program Executive Office, Assembled Chemical Weapons Alternatives, in conjunction with the U.S. Army, has completed an environmental assessment to examine the proposed installation and operation of an explosive destruction technology (EDT) facility at the Blue Grass Army Depot to augment the Blue Grass Chemical Agent-Destruction Pilot Plant (BGCAPP). Upon reviewing the environmental assessment, the Blue Grass Army Depot commander has issued a preliminary "Finding of No Significant Impact," concluding that no significant impacts would occur as a result of the installation and operation of an EDT at the depot. The public comment period on the draft "Finding of No Significant Impact" is from June 25 through July 24, 2013.
