This letter confirms that the Kentucky CAC and CDCAB agree with your proposal to process drained GB rocket warheads in the forthcoming SDC as a precautionary measure associated with worker safety. While recognizing the current process flow design to be safe, we also realize if greater worker safety can be achieved it better adheres to the maximum protection directives contained in PL 99-145.

Additionally, we appreciate the potential usefulness of this second SDC to the Depot proper in their conventional weapons mission upon completion of the ACWA program.

We appreciate your transparency in working with the CAC/CDCAB on this and other issues. We look forward to working with you to resolve inevitable issues as operations begin.

Reagan Taylor,
Madison County Judge Executive
Co-chair CDCAB
