

A Joint Venture of Bechtel National, Inc. and
Parsons Infrastructure & Technology Group Inc.

Construction Request for Proposals posted on Internet

Proven Performers, Good Neighbors

January 18, 2006

The Bechtel Parsons Blue Grass Team posted today information on upcoming construction activities on its web site for potential bidders. The Request for Proposal (RFP) information can be found on the Internet at:
<http://www.bechtelparsonsbgcapp.com/Opportunities.htm>.

"While the web site identifies vendor, supplier and subcontractor opportunities, the scope of work and time of award are subject to available federal funding and various agency approvals," said Chris Haynes, project manager.

Bechtel Parsons Blue Grass was awarded a contract by the Department of Defense's Program Manager for Assembled Chemical Weapons Alternatives to design, build, systemize, operate and close a facility to destroy the chemical weapons stockpile located at the Blue Grass Army Depot. The details of the Blue Grass Chemical Agent-Destruction Pilot Plant earthwork subcontract will be found in the subcontract package. The scope of work contained in the earthwork subcontract includes: Site clearing and grubbing; massive earth cut and fill with associated grading including rock removal; topsoil restoration; a site sedimentation basin; a new, two lane asphalt road with connections into existing roads; grass installation and maintenance and gravel installation.

It is the policy of Bechtel Parsons Blue Grass to pre-qualify its bidders for procurement and subcontracting opportunities. To register, bidders should visit Bechtel's Supplier and Contractor Portal at <http://supplier.bechtel.com/>. Further information is also available online at <http://www.bechtelparsonsbgcapp.com/> under "Vendors/Suppliers".
