

Program Manager Assembled  
Chemical Weapons Alternatives

## Interim Program Manager Named

*Kevin J. Flamm to serve as acting ACWA leader*

### A Partnership for Safe Chemical Weapons Destruction

**March 28, 2007**

**No. 07-01**

**FOR IMMEDIATE RELEASE**

ABERDEEN PROVING GROUND, Md. -- Mr. Kevin J. Flamm will serve as acting program manager for the Assembled Chemical Weapons Alternatives (ACWA) program, when current program manager Mr. Michael A. Parker retires on April 3, 2007, Department of Defense officials announced today.

Flamm most recently served as the Program Manager for the Elimination of Chemical Weapons within the U.S. Army Chemical Materials Agency. In this capacity, he was responsible for the life-cycle management of the destruction of chemical weapons stockpiles in Alabama, Arkansas, Indiana, Maryland, Oregon, and Utah, in addition to related materials and former chemical weapons production facilities.

During his more than thirty years of federal service, Flamm has held numerous positions associated with the U.S. chemical weapons demilitarization and arms control programs. He served as Project Manager, Alternative Technologies and Approaches; Product Manager, Cooperative Threat Reduction; as the Department of Defense representative to, and member of, the United Nations Special Commission Destruction Advisory Panel; technical advisor to the U.S. delegations negotiating the Bilateral Chemical Weapons Destruction Agreement and the Chemical Weapons Convention; Chief of the Technology Exchange and Treaty Compliance Office; and the lead engineer responsible for the testing and evaluation of the equipment, processes and procedures being considered for use in the U.S. chemical demilitarization facilities.

Flamm will act as program manager until a permanent program manager is selected after a competitive selection process.
